

## About QoC Health

QoC Health is a diverse healthcare company that offers platform technology to design and build engagement-focused solutions leveraging new service delivery models. QoC focuses on connecting patients into circles of care and making it easier for healthcare organizations to get connected with their patients. Our engagement platform allows for perfect fit tools and solutions designed to integrate across a wide range of healthcare areas. From Wound Care to Aging Well and everything in between, our technologies help shift care to the community and keep patients out of hospital.

### The QoC Health Culture

A passionate, cross-disciplinary team of technologists, healthcare professionals, and researchers, the QoC team loves what they do, and strives to achieve great things everyday. Motivated, genuine, and fun, the QoC team is driven by innovation, challenging the status quo, with a focus toward the future. As part of the team you will have opportunities to bring solutions to some of our toughest healthcare challenges, across a diverse range of clients from around the globe, with opportunities to learn and grow from every project. We're driven to improve healthcare for everyone, help us shape the future!

## Senior Front End Developer

### Role Description

We are looking for a motivated Sr. Front-end Developer with strong front end, JavaScript, UI/UX experience who has worked with a range of frameworks to join our team. This is a full-time position based out of Toronto where you will work with the development team, project managers and designers to build and customize robust frontend applications and libraries for our existing engagement platform and API's. This is truly a leadership role, with excellent opportunity for ownership of an important and expanding aspect of the business.

## Responsibilities

As a Senior Front-end Developer you will be responsible for architecting, building and optimizing reusable front end HTML5 / JavaScript / Java libraries, API's, UI Modules, UI Widgets, and SDK's to accelerate building robust web applications based on our engagement platform.

In addition, you will:

- Participate in the discovery, design and specification of apps.
- Translate functional requirements into effective and intuitive applications.
- Build and customize front-end web applications using JavaScript and HTML5 based apps.
- Lead, train, and mentor new developers that join the team.
- Participate in the development and architecture planning for our engagement platform, providing insight and guidance on improvements to better support application development.

## Required Skills

- 5+ years of professional software development experience
- 3+ years experience developing front-end web applications in JavaScript
- 3+ years experience with JavaScript, jQuery, TypeScript
- Experience with web technologies (HTML5, JavaScript, jQuery , CSS3, SASS)
- Experience building responsive web applications
- Experience developing hybrid mobile apps using Ionic or Cordova
- Ability to translate functional requirements into effective and intuitive responsive web applications
- RESTful web service integration experience
- Experience working with 3rd party data sources and API's
- Experience with Analytics and Visualization
- Working knowledge of source code management tools (Git, GitHub)
- Ability and desire to write self-explanatory and reusable code
- Excellent problem solving skills and loves technical challenges
- Attention to detail and a passion for quality
- Excellent communication and creative problem solving skills

## Nice to Have Skills

- Experience with encryption methodologies (SHA256, BCrypt, PBKDF2)
- Working knowledge of HL7
- Working knowledge of build management tools (Maven, Gradle)
- Working knowledge of Health Care related privacy policies, including PHIPA and HIPAA
- Experience with live/on demand Video Streaming (TokBox, WebRTC, Vidyo, Wowza)
- Experience with messaging service providers (Twilio)
